

MEP Contractor Target List

26 mechanical, electrical, and plumbing contractors that hire IT — one checklist each.

Work each row in order: site, careers page, IT openings, location fit, a contact, then apply.

Daniel Meyers · [linkedin.com/in/daniel-meyers-882aa88a](https://www.linkedin.com/in/daniel-meyers-882aa88a)

These firms run 5,000–40,000 employees, hundreds of job sites, and fabrication shops on the Microsoft stack most of us already know (M365, Entra, Intune, AD, an ITSM platform). Far fewer applicants than SaaS postings, and hiring managers who are glad to see someone who has actually run the tools. Check the location line first — many roles are hybrid at a regional office; corporate IT at the national firms is the likeliest place to find remote. EMCOR and Comfort Systems are holding companies, so check their subsidiaries too.
